AB A polyolefin hot-melt adhesive compn., exhibiting high adhesive strength at low temp., comprises (A) a polyolefin modified with unsatd. carboxylic acid or anhydride, or its blend contg. an unmodified polyolefin and (B) an ethylene-(meth)acrylic acid ester copolymer, optionally contg. a metal oxide, hydroxide, phosphate, carbonate, or carboxylate. Thus, a blend of 100 parts polyethylene grafted with 0.29% maleic anhydride (d. 0.957, melt index 2.2 g/10 min at 190.degree. and 2.16-kg load) and 10 parts 90.3:9.7 ethylene-Me methacrylate copolymer (I) [25101-13-7] (melt index 5.70 g/10 min) was kneaded at 180.degree. for 5 min, pressed to form a 0.3-mm sheet, sandwiched between steel plates preheated at 160.degree., and pressed for 1 s to give a laminate exhibiting 180.degree. peel strength 2.0 kg/cm, compared with 0 kg/cm for an adhesive no contg. I.
